Career Objective

Seeking to work in a good environment with a team which will help me build a successful career.

Projects

IIT Academic Automation System

ASP.NET MVC 5, Bootstrap 3, SQL Server

This is a web application, developed for the use of IIT, University of Dhaka. It helps to manage programs, batches, students, courses, teaching materials and attendance. Authentication is done using ASP.NET Identity with individual user account and roles are used for authorization. Area feature is also used for group members to work independently. [Source code](#)

Tutor Guide

ASP.NET MVC 5, Bootstrap 3, SQL Server

It is a web application for the students and the home tutors on the context of Dhaka city. Here students can post for home tutors and home tutors can response to tuitions. Students see the responses of their posts and contact the tutors. [Source code](#)

Inventory Management System

ASP.NET MVC 5, Bootstrap 3, SQL Server

This is a web application that automates the inventory management system of IIT, University of Dhaka. Using this application, users can create requisition slip for inventory and send to store-in-charge. The store-in-charge manages register book for inventories. When new items are bought, store-in-charge updates the inventory list.

Responsive Page Design

HTML, CSS, Bootstrap 3

These are some pages designed using only CSS or, CSS and Bootstrap. [Source code](#)
